▮▮▮▮ Product Brochure

The High Density Drawer Cabinets are designed to meet the storage requirements of all industrial and commercial applications. The cabinets are fitted with double safety locking system, with an 200kg weight capacity and 97% opening scope they are designed to accommodate to all storage needs.

Cabinets are manufactured from heavy sheet steel. All external steel parts are coated in a rust-resistant powder-coated finish available in many different heights and are customisable.

Drawers are manufactured from heavy sheet steel and have a rust-resistant powder-coat finish. All drawers use silent runners with roller bearings to ensure smooth, quiet operation. Drawer handles are made from high quality aluminium with replaceable label slides and a clear protector. Custom drawer sizes are available on application.

Cabinets feature an anti-tilt central locking system as standard. The anti-tilt mechanism only allows one drawer to be opened at anyone time, limiting the chance of cabinet roll-over. The locking system utilises a central locking bar at the rear of the cabinet, which prevents the chance of break-in. All cabinets are keyed differently for security. Master keys are available if required.
