Professional Industrial Workbenches

New requirement in dispatch areas

For many years the packaging area was compromised of a standard bench or table with storage for packaging material. This trend has changed drastically during the last few years as packaging areas are taking on additional processes including; light assembly, test, re-packaging, custom labelling, shipping and quality control. Reporting, traceability, and information sharing have become part of most pack and ship processes. This demand for information creates new technology demands, as well as a organized, productive packaging environment.

ACTIWORK packaging benches are designed for activities where productivity, efficiency, effective working conditions are of utmost importance. In shipping or packaging areas these include sorting, bagging, collating, labeling, carton packing, weighing, re-packing, order picking, relabeling, coding, spot gluing, kitting and assemble or package to order activities.

ACTIWORK packaging solutions are used in industries such as electronics, health care, pharmaceutical fine mechanics, luxury, aviation, nanotech, military and clean room based technology as well as third party logistics centers.

Professional Series
